- 1** ChaosMON—application-specific monitoring and display of performance 82%
 information for parallel and distributed systems

Carol Kilpatrick , Karsten Schwan

ACM SIGPLAN Notices , Proceedings of the 1991 ACM/ONR workshop on Parallel and distributed debugging December 1991

Volume 26 Issue 12

- 2** An inclusive session level protocol for distributed applications 82%

V. S. Sunderam

ACM SIGCOMM Computer Communication Review , Proceedings of the ACM symposium on Communications architectures & protocols August 1990

Volume 20 Issue 4

The design of an inclusive session level protocol targeted at distributed applications on local networks is presented. The session protocol is motivated by the observation that application requirements, as well as network characteristics, for current and future distributed systems are not well matched to available protocol suites. The nature of services provided in the proposed protocol are derived from typical application requirements, and include group communications, synchronization and ...
